Description

On this tour we feel and experience the volcanic origins of the Island in Furnas, a magical place. We start by visiting the Caldeiras da Lagoa das Furnas (Furnas Lake Calderas), a place where we cook the famous "cozido das Furnas" (a very special meal cooked only with the steam of the Earth) and continue with a soft walk that crosses a stream and circles the lakeside. During this walk we have the opportunity to appreciate a variety of endemic flora species. Next we visit the town of Furnas, with its fumaroles and hot springs that contain water with different tastes. The Cozido meal is served in a local restaurant. After lunch we visit the centenary Terra Nostra botanical garden that is famous for its extraordinary collection of native plants on the Azores, as well as others from all over the world that have adapted to the local garden conditions. At the end of the visit you are invited to bathe in an iron-rich hot water swimming pool that has a temperature of 35-40°C, an exquisite experience! On the way back to Ponta Delgada we stop at several beautiful viewpoints on the North Coast and also at the only tea plantation in Europe where we will be able to visit the working tea factory and have a lovely break to taste the tea.

Recommendations

Bring: comfortable light clothes, sweater, raincoat, walking boots or shoes, swimming suit and towel, hat, sunblock, backpack, water.

70€ Price per person includes

Description

Located in the eastern-most part of the island, Nordeste is considered to be the most beautiful region in the island and it has already been considered to be the most flower-rich region in Europe. Our first stop is well worth it as we stop at the viewpoint of Salto do Cavalo's peak. This viewpoint is marked by astonishing and wide views over Povoação, the first place to be settled on the island, and the coast that extends beyond Povoação. We continue our trip to the Priolo (Azores Bullfinch) Environmental Center to visit the interactive exposition that fills the visitor with interesting knowledge about the area of Serra da Tronqueira, its fauna and flora, and more specifically about the Priolo bird (*Pyrrhula murina*) which is endemic to São Miguel Island in the Azores. Next to the centre we can also visit the Endemic Species Garden. Finally we go down to the town of Nordeste where we have lunch in a local restaurant. On the way back to Ponta Delgada we will stop at wonderful viewpoints over the coast and Povoação.
